

More vision. More insight. More care.

ENVIRONMENTAL REMEDIATION SPECIALISTS

More skills and experience

Moore Management is a specialist environmental remediation services group with over 10 years experience and expertise in contaminated site remediation (soils and groundwater). Moore Management's skills and experience provide quality service and advice that is practical and cost effective.

Moore Management prides itself on offering excellent service on both large and small projects, and draws on its experience in project management, communication and administration.

Our team of qualified scientists and engineers are proficient and experienced in all areas of contaminated land remediation, specialising in underground storage tank (UST) removal, soils treatment and disposal, asbestos contaminated soils handling and disposal, hazardous materials handling, treatment and disposal. Moore Management can also design and install groundwater treatment/extraction systems.

Our scientists and engineers have a detailed knowledge of applicable standards, guidelines and codes of practice.

We will provide you with site specific work method statements, risk assessments, OH&S and environmental management plans which meet all relevant guidelines and standards.

The range of services we offer includes:

- Contaminated Site Remediation Project Managers
- UST & AST Removal and Installation
- Contaminated Soils Remediation/Treatment and Disposal
- Asbestos Removal (AS1)
- Groundwater Barrier Walls
- Groundwater Treatment and Disposal
- Minor Civil and Demolition Works
